Professional Summary

Full-stack developer (MERN) with a B.E. in Computer Science (AI & ML), who has built and deployed two production-style web applications featuring JWT authentication, role-based access control, cloud media storage and RESTful APIs. Strong foundation in Python, SQL and data analysis. Looking to contribute to software and web development teams building responsive, secure and scalable applications.

Education

B.E. Computer Science and Engineering (AI & ML) Nov 2022 – Apr 2026

Easwari Engineering College, Chennai

Higher Secondary Education Jun 2021 – May 2022

St. Joseph's Matriculation Higher Secondary School, Perambalur

Technical Skills

Languages: JavaScript, Python, SQL, HTML, CSS
Frontend: React.js, React Router, Vite, Tailwind CSS, Responsive Web Design
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC)
Databases: MongoDB, Mongoose, MySQL, Firebase Firestore
Tools & Deployment: Git, GitHub, Postman, Cloudinary, Vercel, Render, VS Code
Data Analytics: Pandas, Power BI, Matplotlib, EDA, KPI Analysis, Excel

Projects

WCase – Creator Portfolio Platform | React.js, Node.js, Express.js, MongoDB, Cloudinary Live Demo | GitHub

- Built and deployed a full-stack platform where creators manage image/video works, publish shareable public portfolios and receive visitor enquiries.
- Secured the application with JWT authentication, email OTP password recovery, server-side file validation and API rate limiting.
- Integrated Cloudinary for media storage and built responsive creator dashboards and public portfolio pages with likes and sharing.

elog – Employee Management System | React.js, Node.js, Express.js, MongoDB Live Demo | GitHub

- Built and deployed an Admin/Employee system with JWT authentication, protected routes and role-based access control.
- Developed employee, department, designation, attendance and leave modules with CRUD operations, validation, attendance corrections and leave approval workflows.
- Implemented check-in/check-out with working-hour tracking, CSV employee import/export and password recovery through RESTful APIs.

Customer Churn Analysis | Python, Pandas, Power BI GitHub

- Analysed 7,032 telecom customer records with Python and Pandas to uncover churn patterns, customer behaviour and retention trends.
- Identified contract type, tenure and payment method as major churn drivers and built an interactive Power BI dashboard with KPI cards and filters to present the insights.

E-Commerce Sales Analysis | Python, SQL, Power BI GitHub

- Cleaned and analysed 9,994 e-commerce sales records using Python and SQL (EDA, aggregation, KPI analysis) to evaluate sales, profit, customer, regional and product-category performance.
- Delivered an interactive Power BI dashboard to communicate business insights to non-technical stakeholders.

Certifications

- Microsoft Azure Fundamentals (AZ-900) Aug 2025

Leadership & Extracurricular Activities

Digital Head – CSE (AI & ML) Department | Short Film Editing | Tennis
