Professional Summary

Computer Science Engineering graduate specialising in AI & ML with hands-on experience in full-stack web development using the MERN stack. Skilled in building responsive, database-driven applications using React.js, Node.js, Express.js and MongoDB, with experience in RESTful API development, JWT authentication, role-based access control, CRUD operations, API integration and validation. Also proficient in Python, SQL and Power BI for data analysis, exploratory analysis and business intelligence.

Education

B.E. Computer Science and Engineering (AI & ML)

Nov 2022 – Apr 2026

Easwari Engineering College, Chennai

Higher Secondary Education

Jun 2021 – May 2022

St. Joseph's Matriculation Higher Secondary School, Perambalur

Technical Skills

Languages: JavaScript, Python, SQL, HTML, CSS

Frontend: React.js, Vite, React Router, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC)

Databases: MongoDB, Mongoose, MySQL, Firebase Firestore

Data Analytics: Pandas, Power BI, Matplotlib, EDA, KPI Analysis, Excel

Developer Tools: Git, GitHub, VS Code, Postman, Jupyter Notebook

Projects

WCase – Creator Portfolio Platform | React.js, Node.js, Express.js, MongoDB

Aug 2026

- Developed a full-stack creator portfolio platform enabling users to upload and manage image/video works, create portfolios and publish shareable public portfolio pages.
- Implemented JWT authentication, email OTP/password recovery, media uploads, portfolio publishing, enquiries, likes and sharing functionality.
- Added server-side media validation, access control, rate limiting and responsive creator/public interfaces to improve security, reliability and user experience.

eLog – Employee Management System | React.js, Node.js, Express.js, MongoDB, JWT

Aug 2026

- Developed a full-stack MERN employee management system with secure JWT authentication, protected routes and Admin/Employee role-based access control.
- Built employee, user, department, designation, attendance and leave management modules with CRUD operations, search, validation and MongoDB integration.
- Implemented attendance check-in/check-out, working-hour calculation, CSV employee import/export and password-reset workflows through RESTful APIs.

Customer Churn Analysis | Python, Pandas, Power BI

May 2026

- Analysed **7,032 telecom customer records** using Python and Pandas to identify churn patterns, customer behaviour and retention trends.
- Identified major churn factors including contract type, tenure and payment method, and developed an interactive Power BI dashboard with KPI cards, filters and visualisations.

E-Commerce Sales Analysis | Python, SQL, Power BI

Apr 2026

- Analysed **9,994 e-commerce sales records** using Python and SQL to identify sales, profit, customer, regional and product-category performance trends.
- Performed data cleaning, exploratory data analysis (EDA), SQL aggregation and KPI analysis, and developed an interactive Power BI dashboard to communicate business insights.
