Professional Summary

Full-Stack Developer with hands-on experience developing and deploying MERN applications using React.js, Node.js, Express.js, and MongoDB. Skilled in building RESTful APIs, implementing CRUD operations, JWT authentication, role-based access control (RBAC), server-side validation, API rate limiting, and Cloudinary integration. Experienced in debugging application issues, implementing code-level fixes, and validating software functionality. Additional experience in Python, SQL, and Power BI.

Technical Skills

Languages: JavaScript, Python, SQL, HTML5, CSS3
Frontend: React.js, React Router, Vite, Tailwind CSS, Responsive Web Design
Backend & APIs: Node.js, Express.js, RESTful APIs, CRUD Operations, JWT Authentication, RBAC, Server-Side Validation, API Rate Limiting
Databases: MongoDB, Mongoose, MySQL, Firebase Firestore
Tools & Deployment: Git, GitHub, Postman, Cloudinary, Vercel, Render, VS Code
Data Analysis: Pandas, Power BI, Matplotlib, Exploratory Data Analysis (EDA), KPI Analysis, Excel

Work Experience

BRR Softwares Systems Private Limited *July 2026 – Present*

Software Developer *October 2026 – Present*

- Debug application issues, investigate root causes, and implement code-level fixes to improve functionality and resolve defects.
- Perform functional and regression testing to verify code changes and ensure application stability.

Software Development Intern *July 2026 – September 2026*

- Tested web application functionality and user workflows to identify defects and verify expected behaviour.
- Collaborated in defect identification and fix verification while gaining practical experience with software development workflows.

Projects

WCase – Creator Portfolio Platform Live Demo | GitHub

React.js, Node.js, Express.js, MongoDB, Cloudinary

- Developed and deployed a full-stack creator portfolio platform supporting media management, public portfolio sharing, and visitor enquiries.
- Implemented JWT authentication, email OTP-based password recovery, server-side file validation, and API rate limiting.
- Integrated Cloudinary for media storage and developed responsive dashboards and public pages with like/share functionality.

elog – Employee Management System Live Demo | GitHub

React.js, Node.js, Express.js, MongoDB

- Developed a MERN employee management system with JWT authentication, protected routes, and role-based access control (RBAC) for administrator and employee workflows.
- Built RESTful CRUD APIs for employee, department, designation, attendance, and leave management with validation and approval workflows.
- Implemented check-in/check-out, working-hour tracking, attendance corrections, CSV employee import/export, and password recovery.

Customer Churn Analysis GitHub

Python, Pandas, Power BI

- Analyzed 7,032 telecom customer records using Python and Pandas to identify churn patterns across contract types, tenure, and payment methods, and developed an interactive Power BI dashboard with KPI cards and filters to visualize churn trends.

E-Commerce Sales Analysis GitHub

Python, SQL, Power BI

- Processed and analyzed 9,994 sales records using Python and SQL, performing EDA and KPI analysis across regions, customers, and product categories to visualize sales and profitability.

Education

Easwari Engineering College *Nov 2022 – Apr 2026*
B.E. in Computer Science and Engineering (AI & ML) *Chennai, Tamil Nadu, India*

St. Joseph's Matriculation Higher Secondary School *Jun 2021 – May 2022*
Higher Secondary Education (Class XII) *Perambalur, Tamil Nadu, India*

Leadership & Activities

Digital Head – CSE (AI & ML) Department | Short Film Editing | Tennis
